

## ...A Grocery Store?

  Indian hunters stampeded herds of bison off of the cliffs that are here in the park. The bison provided American Indians with lots of food and many of the supplies they needed. See if you can match the bison part with its use.

### Stay Safe!

Bison are great animals to watch, but keep your distance. They are big and strong. They spin around faster than a horse and can jump a six foot fence. They may charge if you get too close. Remember, they are WILD!
